

ATEEQUR RAHMAAN

FULL STACK DEVELOPER

LinkedIn - iamateeq | GitHub - ateequrrahmaan | 91+ 8939398383

Professional Summary

Full Stack Developer with hands-on experience in the MERN stack and Flutter, building web and mobile applications. Strong foundation in JavaScript, TypeScript, React, Node.js, and database management. Passionate about problem-solving, clean code practices, and continuous learning.

Projects

Tracksup | TypeScript

> Built a B2B supply chain management platform with inventory tracking, order management, procurement workflows, delivery tracking, and role-based dashboards for suppliers, retailers, and employees.

Nearby | Flutter

> Built a location-based mobile application for discovering nearby shops, products, offers, and reels. Implemented user authentication, maps integration, promotions, saved items, and admin management features.

Project Management | MERN Stack

> Developed a project management application using MongoDB, Express.js, React, and Node.js. Implemented task assignment, progress tracking, role-based access control, and secure authentication for team collaboration.
